Professional Summary

Full-stack developer with 10+ years of experience building web applications and managing Linux infrastructure. Primary role at Tracked since 2014; concurrently took on consulting and contract projects across e-commerce, government, media, and logistics sectors. Stacks range from PHP/Laravel to Python/Django and Ruby on Rails. Focused on scalable systems, automated deployments, and maintainable code.

Professional Experience

Tracked is my primary role since 2014. Additional experiences were consulting projects and temporary contracts taken in parallel, prioritizing diverse technical challenges.

Softec S.R.L. — Developer (Contract)

September/2024 — December/2024

- Built custom systems for Neuland, from planning through production deployment.
- Implemented REST APIs with Django and NestJS, integrating with ReactJS frontends.
- Built a database migration system from a Bims legacy system to internal PostgreSQL.
- Collaborated in a multidisciplinary team to deliver projects on tight deadlines.

Django ReactJS NestJS PostgreSQL

Mambo Business Technology — Developer (Contract)

February/2024 — September/2024

- Developed and maintained ALISTER and Comply systems, trade marketing and compliance platforms.
- Optimized SQL queries reducing load times by 60% in high-use modules.
- Supported key users in the trade marketing area, prioritizing incidents by criticality.

Laravel Django ReactJS PostgreSQL

SEGEL Soluciones Inteligentes — Developer (Contract)

April/2023 — August/2023

- Built a POS system with Laravel handling 1,000+ clients and transactions per day.
- Developed an e-learning platform with Laravel for 100+ concurrent users.

Laravel CodeIgniter PostgreSQL JavaScript

Excelsis S.A. — Linux Administrator (Contract)

December/2022 — February/2023

- Administered 2 Oracle Linux servers in a virtualized infrastructure (VMware/Proxmox).
- Managed users, permissions, and security audits on production servers.

Oracle Linux Virtualization Bash Backup & Recovery

Facilandia — Web Developer (Contract)

September/2022 — December/2022

- Maintained and extended the e-commerce platform built with Ruby on Rails.
- Optimized frontend response times, improving Core Web Vitals metrics.

Ruby on Rails JavaScript PostgreSQL HTML/CSS

Capitan Lott — Web Developer (Contract)

April/2022 — August/2022

- Developed websites for the agency and its clients, from landing pages to internal systems.
- Built admin panels with Laravel and CakePHP for content management.
- Delivered projects on time meeting client requirements with no significant tech debt.

Laravel CakePHP MySQL Bootstrap

IDTK — Web Developer (Contract)

November/2021 — February/2022

- Contributed to the e-siger system migration for the Ministry of Public Registry.
- Documented system architecture and user manual for knowledge transfer.

Laravel MSSQL JavaScript

Nosotros S.A. — Web Developer (Contract)

June/2021 — August/2021

- Developed complete web projects with PHP, MySQL, and responsive front-end design with Bootstrap.

PHP CakePHP Laravel Bootstrap MySQL

Grupo Vierci — Web Developer (Contract)

July/2017 — April/2021

- Diagnosed and resolved recurring news server outages during pandemic traffic spikes.
- Implemented load balancing with HTTP service thread timeout control, eliminating saturation from breaking news.
- Maintained high-traffic news portals (WordPress, Rails, Laravel) ensuring 24/7 availability.
- Integrated third-party APIs (social media, advertising, analytics) and coordinated deployments across dev, staging, and production.

WordPress Ruby on Rails Laravel MySQL Nginx

Tracked — Backend Developer (Primary Role)

January/2014 — Present

- Built the backend system of the tracking platform with Java and ExtJS.
- Designed the database architecture to store and query over 10,000 tracking records.
- Evolved the system from a Java monolith to modular services with PostgreSQL and REST APIs.
- Automated logging and monitoring processes for early failure detection.
- Ongoing production platform support with 99.9% uptime.

Java

ExtJS

PostgreSQL

REST APIs

Education

Self-taught — Continuous learning since 2004 through technical documentation, open-source communities, and hands-on projects.

Linux Basics Course — Universidade Estácio de Sá, Rio de Janeiro, Brazil

2004 — Summer Course

Introduction to Programming — Universidade Estácio de Sá, Rio de Janeiro, Brazil

2004 — Summer Course

Languages

- **Spanish:** Native
- **English:** Technical
- **Portuguese:** Basic

Technical Skills

Category	Technologies	Level
Backend	PHP (Laravel, CakePHP, CodeIgniter)	Advanced
	Python (Django, Flask)	Intermediate
	Ruby (Rails, Sinatra)	Intermediate
	Node.js (Express)	Intermediate
	Java	Basic
Frontend	ReactJS	Intermediate
	VueJS	Intermediate
	HTML5, CSS3, JavaScript	Advanced
	Tailwind CSS, Bootstrap	Advanced
Databases	MySQL, PostgreSQL	Advanced
DevOps	Linux (Red Hat, Debian, Oracle Linux)	Advanced

Category	Technologies	Level
	Docker	Intermediate
	Jenkins	Intermediate
	Git & GitHub	Advanced
	Server Administration	Advanced

Key Achievements

Load Balancing for News Portals — Grupo Vierci

Problem: During the pandemic, news portal servers became overloaded with every breaking news publication, causing cascading outages.

Analysis: Investigated server architecture and load patterns, identifying that HTTP service threads accumulated uncontrollably under sudden traffic spikes, exhausting server resources.

Solution: Implemented load balancing with intelligent traffic distribution and configured timeouts on HTTP service threads to release blocked resources. This distributed load evenly across servers and prevented saturation.

Result: Servers stopped crashing even at peak breaking news traffic. 100% availability during the health crisis with zero further outages.

Tools & Methodologies

- Version control: Git, GitHub
- CI/CD: Jenkins, automated deployments
- Methodologies: Scrum, Kanban
- Operating systems: Linux, macOS, Windows
- Virtualization: VMware, Proxmox, Docker
